- -Design Changes
- -Advantage ICF Basement
- -Insulspan SIP Walls and Roof
- -Engineered Floor Decks
- -Rough Interior Walls
- -Rough Stairs and Porches
- -Windows and Doors

RESIDENCE VENTILATION NOTE:
A MECHANICAL VENTILATION SYSTEM IS REQUIRED TO PROVIDE AIR MOVEMENT AND REMOVE HUMIDITY. EXCESS HUMIDITY IN THE HOME COULD RESULT IN A BUILD UP OF WATER VAPOR IN UNWANTED AREAS CAUSING SEVERE DAMAGE TO STRUCTURAL INSULATED PANELS OR OTHER BUILDING MATERIAL.

* FOR A STRUCTURE TO RECIEVE AN ENERGY STAR RATING IT MUST BE INSPECTED BY A "HOME ENERGY RATING SYSTEM" (HERS) INSPECTOR. SIP STRUCTURES PROVIDE HIGHLY EFFICIENT AND CONTINUOUS INSULATION, THEREFORE THE EPA HAS WAIVED THE NEED FOR A BLOWER DOOR TEST FOR SIP HOMES. ALL THAT IS REQUIRED IS A VISUALL INSPECTION TO CONFIRM THAT THE SIPS ARE INSTALLED PROPERLY. THIS MEANS GETTING A ENERGY STAR RATING IS CHEAPER AND EASIER THAT EVER, WHEN YOU BUILD WITH SIPS.
